**Venue: Khun Khun Ji Girls P. G. College, Chowk,
Lucknow, Uttar Pradesh, India**

About the College

Khun Khun Ji Girls P. G. College is a prestigious institution dedicated to providing quality education to girls, fostering their academic and personal growth in a disciplined yet encouraging environment. Strategically located in the city's heart, we offer a range of courses including B.A., B.Com., B.Ed, and M.A. in Sociology and Education. Through our Tarashakti Kendra, we provide value-added courses and skill development programs, ensuring our students are industry-ready and equipped with the skills necessary to excel in their chosen fields. The college is also proud to host the Abhyuday Centre, offering coaching for Civil Services aspirants. Our government-approved hostel facility is currently under construction, aiming to provide a safe and conducive living environment for our students. Our faculty comprises highly qualified and dedicated educators who strive to mentor students, not only in academics but also in facing real-life challenges under over mentor-mentee program. We are committed to providing first-class infrastructure, including smart classes, computer lab, a flourishing digital library with over 25,000 books from diverse disciplines, and a large playground for overall development. The college has two NSS units, engaging students in community development activities and instilling a sense of social responsibility. Our NCC girls' battalion fosters national pride and a spirit of service to the nation. We have established Memorandum of Understanding with various government and private institutions to broaden the exposure of our students and faculty, providing them with opportunities for growth and development. At Khun Khun Ji Girls P.G. College, we strive to create an environment where students can thrive academically, personally, and professionally, becoming confident and capable individuals ready to make a positive impact in society.

About the Children Unbound Foundation

Children Unbound Foundation (CUF) is a New Delhi-based non-profit working through its health initiative CANLIFE – Cancer Prevention and Early Detection. The program focuses on raising awareness about early symptoms of cancer and promoting timely screening and treatment. CUF conducts community awareness sessions, counseling services, screening camps, HPV vaccination drives for cervical cancer prevention and facilitates medical referrals and treatment support for patients in need.

In collaboration with Rajiv Gandhi Cancer Institute and Research Centre (RGCIRC), Delhi, and other regional cancer hospitals, CUF strives to reduce cancer-related morbidity and mortality through prevention, early detection, and accessible care.

About the Conference

The Two-Day International Conference on "Health, Humanity, and Healing: Interdisciplinary Perspectives on Cancer" is conceived as a multidisciplinary academic platform that brings together scholars, practitioners, researchers, policymakers, and social thinkers from diverse domains. The conference recognizes that cancer is not merely a biomedical condition but a complex human experience shaped by biological, psychological, social, cultural, environmental, ethical, and policy dimensions.

The theme underscores that healing extends beyond clinical intervention—it encompasses compassion, dignity, social support, mental well-being, environmental responsibility, and equitable access to care. This conference aims to foster dialogue across disciplines, encouraging collaboration among experts from:

- Health and Medical Sciences
- Life Sciences and Biotechnology
- Environmental Studies
- Psychology and Behavioral Sciences
- Sociology and Social Work
- Public Health and Policy Studies
- Ethics and Philosophy
- Literature, Culture, and Humanities
- Education and Communication Studies

Through keynote addresses, panel discussions, paper presentations, and interactive sessions, the conference will promote interdisciplinary research, encourage critical reflection, and generate actionable insights. The ultimate goal is to cultivate a compassionate, evidence-based, and socially responsive framework for understanding health and healing in contemporary society. This conference aspires to become a shared intellectual space where science meets society, innovation meets empathy, and research aligns with human values—advancing not only medical knowledge but also collective well-being.

Objectives

The primary objective of this two-day international conference is to foster interdisciplinary dialogue on cancer research, prevention, diagnosis, treatment, and supportive care. The conference aims to enhance awareness about emerging scientific advancements while also addressing psychosocial, sociological, environmental, and ethical dimensions of cancer. It seeks to encourage knowledge exchange among academicians, researchers, healthcare professionals, and students, promote student participation through oral and poster presentations, and inspire collaborative approaches that bridge science, society, and humanity in the fight against cancer.

Sub-Themes

- The need for cancer awareness in the school curriculum
- Teacher training and capacity building for health education
- Community outreach through educational institutions
- Concept of health and holistic well-being in the Indian Knowledge System
- Relevance of ancient Indian medicine (Ayurveda, Siddha, Unani) in cancer management
- Health Education & Awareness
- Spiritual dimensions of healing in Indian philosophical traditions
- Social perceptions of cancer and their impact on patients' lives
- Stigma, discrimination, and social isolation
- Socio-economic factors influencing diagnosis and treatment
- Exercise and physical activity as preventive strategies
- Lifestyle modification and fitness awareness
- The need for psychotherapy and counselling in cancer treatment
- Coping mechanisms, stress management, and resilience
- Environmental pollutants and carcinogenic risks
- Sustainable development and preventive health strategies
- Genetic and epigenetic perspectives
- Cultural narratives of illness and healing
- Preventive health through lifestyle modification
- Artificial intelligence in cancer diagnosis
- Body-mind-environment connection in healing
